EDUCATION

Maharishi Markandeshwar (Deemed to be University) Mullana, Ambala
Bachelor of Technology in Computer Science and Engineering | CGPA: 6.79/10 *August 2024 – June 2028*
Coursework: Data Structures and Algorithms (Java), Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming

S.R.D.A.V Public School Saharanpur
Class 12th – 74.6% *2022 – 2023*

PROJECTS

InternSetu | *React, Vite, React Router, Node.js, Express.js, SQLite, JWT* **GitHub**
- Built solo a full-stack internship management platform with separate candidate and administrator workflows covering registration, verification, application and final allocation; developed for Smart India Hackathon 2026 and cleared the institution's internal round.
- Implemented eligibility checks, skill-based matching with match scores and skill-gap identification, and seat-availability validation before allocation processing.
- Secured the Express API with JWT authentication and bcryptjs password hashing, organized into config, controllers, middleware and routes layers, with SQLite for storage.

Roamora | *React, Vite, Node.js, Express.js, MongoDB, Mongoose, Leaflet* **GitHub**
- Built a full-stack travel and accommodation platform with a React (Vite) frontend and a Node.js/Express backend storing listings, hosts, guests and reviews in MongoDB through Mongoose.
- Implemented stay discovery by destination and category, property detail pages, and map-based exploration using Leaflet and React Leaflet.
- Added authentication with seeded host and guest accounts, wishlist and trip pages, an integrated Travel Copilot for trip planning, and a seed script that populates sample data.

OPEN-SOURCE CONTRIBUTIONS

OWASP WrongSecrets | *Kubernetes, Bash* **PR #2731**
- Replaced incorrect Bash "wait 10" commands (which wait on a process ID, not seconds) in the README and k8s-vault-minikube-start.sh with a kubectl condition-based readiness check for the Sealed Secrets controller, and incorporated maintainer review feedback.

Kiwix JS | *Docker, Technical Documentation* **PR #1524**
- Authored a Docker troubleshooting guide covering Restricted mode over plain HTTP, offline access, image updates, ZIM archive handling, platform support and browser-console vs container logs; revised it through two rounds of maintainer review.

100 Days 100 Web Projects | *HTML, JavaScript* **PR #2018**
- Added a validatePassword() check to the sign-up page enforcing no spaces, 8+ characters and upper-case, lower-case, number and special-character rules; fixed a duplicate submit listener and added a live error message and rules hint.

Cara | *HTML, JavaScript* **PR #874**
- Updated register.js and register.html to reject passwords containing spaces and enforce password-strength requirements, with a user-friendly hint and live validation feedback.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML5, CSS3
Frontend: React, Vite, React Router, Leaflet / React Leaflet
Backend & Security: Node.js, Express.js, JWT, bcryptjs
Databases: MongoDB (Mongoose), SQLite
Tools & Platforms: Git, GitHub, GitHub Pages, npm
Core CS: Data Structures and Algorithms, DBMS, Operating Systems, Object-Oriented Programming, Computer Networks

ACHIEVEMENTS

- **Adobe University Hackathon 2026** – Semifinalist.
- **The Big Code 2026** – Cleared the qualifier and advanced to Round 1; the organizer's email placed me among the top 15,000 students.
- **Schneider Electric Yuva Yodha Energy Tech Hackathon** – FoundrySense selected for the Prototype Round.
- **Smart India Hackathon 2026** – Cleared my institution's internal hackathon round with InternSetu.
- **GirlScript Summer of Code** – Global rank 2015 out of 47,924 participants (approximately top 5%); seven badges earned.
